WONDERY

Study Methodology

National parent survey

- In June 2023, Edison Research conducted a national online survey of 1,272 U.S. adults
- All respondents are parents/guardians who have at least one child age 6-12
- Parents were asked questions about the media usage and consumption of their kids age 6-12
- Data weighted to reflect the sex, age, and ethnicity of U.S. parents of kids age 6-12

Kid Podcast Listener Survey (Parent-administered)

- If a parent in the national study had a kid age 6-12 who listened to podcast in the last month, their kid was invited to participate in an additional parent-administered survey
- 245 kids who listened to a podcast in the last month participated in a short online survey about their podcast listening

In-home family interviews

- Edison Research conducted in-home interviews in the New York tri-state area with families who have kids who listen to podcasts
- Interviews were conducted with parents and kids together to collect perspectives from both sides

Study Overview

**Podcasts already
have strong reach
among kids**

**Kids are engaged
listeners**

**Podcasts foster
family connections**

**Kids are your
future listeners**
